DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-1, drawn to a heat-sealing machine and method therefor.

Group II, claim(s) 12-18, drawn to an embossing method and workpiece embossed by said method

Group III, claim(s) 19-21, drawn to a work pressing machine.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I, II and III each have their own respective special technical features of a sealing surface, formed cuts between a male and female pressing part embossing a formed hollow part, and a pressing part of a workpiece other than a part having an embossed hollow part, respectively. As no single general inventive concept exists, unity of invention is found lacking.

A telephone call was made to Roger Parkhurst on September 30, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1745

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
